JNTRY	UBSIR (Lithuanian SSR)	REPORT	25X
JECT	Port of Klaypeda	DATE DISTR.	
		NO. OF PAGES 2	
TE OF INFO.		REQUIREMENT NO.	
CE ACQUIRED		REFERENCES	25X1
E ACQUIRED		This is UNEVALUATED	
	SOURCE EVALUATIONS ARE DI	EFINITIVE. Information: CONTENT IS TENTATIVE.	
2. Ko nav	al vessels of air acti	in the port until the morning of 16 June. vity was noted.  suse of the inclement weather, i.e., south-	25X1
	vinds of moderate gale : orthern ballast quay wa		25 <b>X</b> 1
3. The mosphere part of about meters pressi quay 1 On the	orthern ballast quay wa dimitely 200 meters lon. of the quay area. It we two and one-half meters high. The depth alon. ons in the quay wall ( ength, including the o	s being rebuilt or enlarged. A quay wall, g, was under construction in the northern as made of steel and cement blocks. It was shigh, whereas the older portion is only two gside will be 24 feet. There were two desce sketch).    estimated the total ld and the new, to be about 600 meters. It jib cranes: two of five tons capacity,	, 25X1
3. The mosphere part of about meters pressi quay 1 On the	orthern ballast quay wa dimitely 200 meters lon. of the quay area. It we two and one-half meters high. The depth alon. ons in the quay wall ( ength, including the of quay are three electric	s being rebuilt or enlarged. A quay wall, g, was under construction in the northern as made of steel and cement blocks. It was shigh, whereas the older portion is only two gside will be 24 feet. There were two desce sketch).    estimated the total ld and the new, to be about 600 meters. It jib cranes: two of five tons capacity,	
3. The mosphere approximately about meters pressingus 1 On the and on	orthern ballast quay wa dimitely 200 meters long of the quay area. It we two and one-half meters high. The depth along one in the quay wall ( ength, including the or quay are three electrical of ten tons capacity	s being rebuilt or enlarged. A quay wall, g, was under construction in the northern as made of steel and cement blocks. It was shigh, whereas the older portion is only two gside will be 24 feet. There were two desce sketch).    estimated the total ld and the new, to be about 600 meters. It jib cranes: two of five tons capacity,	, 25X1
3. The mosphere approximately about meters pressingus 1 On the and on	orthern ballast quay wa dimitely 200 meters long of the quay area. It we two and one-half meters high. The depth along one in the quay wall ( ength, including the or e quay are three electrics of ten tous capacity	s being rebuilt or enlarged. A quay wall, g, was under construction in the northern as made of steel and cement blocks. It was shigh, whereas the older portion is only two gside will be 24 feet. There were two demonstrated with the set immated the total ld and the new, to be about 600 meters. It jib cranes: two of five tons capacity,	, 25X1
3. The no approx part of about meters pressi quay 1 On the and or	orthern ballast quay wa dimitely 200 meters long of the quay area. It we two and one-half meters high. The depth along one in the quay wall ( ength, including the or e quay are three electrics of ten tous capacity	s being rebuilt or enlarged. A quay wall, g, was under construction in the northern as made of steel and cement blocks. It was shigh, whereas the older portion is only two gside will be 24 feet. There were two demonstrated with the set immated the total ld and the new, to be about 600 meters. It jib cranes: two of five tons capacity,	25X1 , 25X1
3. The mospher of approximately 1 on the and on Shatch	orthern ballast quay wardinately 200 meters long of the quay area. It we two and one-half meters high. The depth along one in the quay wall (ength, including the orther of ten tous capacity as of the New Part of the New Pa	s being rebuilt or enlarged. A quay wall, g, was under construction in the northern as made of steel and cement blocks. It was shigh, whereas the older portion is only two gside will be 24 feet. There were two demonstrated with the set immated the total ld and the new, to be about 600 meters. It jib cranes: two of five tons capacity,	25X1 , 25X1
3. The mospher of approximately 1 on the and on Shatch	orthern ballast quay wa dimitely 200 meters long of the quay area. It we two and one-half meters high. The depth along one in the quay wall ( ength, including the or e quay are three electrics of ten tous capacity	s being rebuilt or enlarged. A quay wall, g, was under construction in the northern as made of steel and cement blocks. It was shigh, whereas the older portion is only two gside will be 24 feet. There were two demonstrated with the set immated the total ld and the new, to be about 600 meters. It jib cranes: two of five tons capacity,	25X1 , 25X1
3. The mospher of approximately 1 on the and on Shatch	orthern ballast quay wardinately 200 meters long of the quay area. It we two and one-half meters high. The depth along one in the quay wall (ength, including the orther of ten tous capacity as of the New Part of the New Pa	s being rebuilt or enlarged. A quay wall, g, was under construction in the northern as made of steel and cement blocks. It was a high, whereas the older portion is only two gside will be 24 feet. There were two desce sketch).  estimated the total d and the new, to be about 600 meters. It jib cranes: two of five tons capacity, the Morthern Ballast Quay in Klaipeda:	25X1 , 25X1
3. The mospher of approximately 1 on the and on Shatch	orthern ballast quay wardinately 200 meters long of the quay area. It we two and one-half meters high. The depth along one in the quay wall (ength, including the orther of ten tous capacity as of the New Part of the New Pa	s being rebuilt or enlarged. A quay wall, g, was under construction in the northern as made of steel and cement blocks. It was a high, whereas the older portion is only two gaids will be 24 feet. There were two desce sketch).    estimated the total     dand the new, to be about 600 meters.   ic jib cranes: two of five tons capacity,   he Morkhern Ballast Quay in Klaipeda:	25X1 , 25X1
3. The mospher of approximately 1 on the and on Shatch	orthern ballast quay wardinately 200 meters long of the quay area. It we two and one-half meters high. The depth along one in the quay wall (ength, including the orther of ten tous capacity as of the New Part of the New Pa	s being rebuilt or enlarged. A quay wall, g, was under construction in the northern as made of steel and cement blocks. It was a high, whereas the older portion is only two gside will be 24 feet. There were two desce sketch).  estimated the total d and the new, to be about 600 meters. It jib cranes: two of five tons capacity, the Morthern Ballast Quay in Klaipeda:	25X1 , 25X1
